

Let's Power the East Bay with Local Clean Energy!

WEDNESDAY JULY 18th

JOIN US TO CALL FOR THE ADOPTION & IMPLEMENTATION OF THE LOCAL DEVELOPMENT BUSINESS PLAN

When: 5:00pm: Rally and Press conference with East Bay Clean Power Alliance

6:00pm: East Bay Community Energy board meeting

Where: 777 B Street Hayward, CA 94541 (across from the Hayward BART station)

In 2016 the East Bay Clean Power Alliance, the Local Clean Energy Alliance and over 60 other organizations successfully won both the establishment of a community choice energy program, [East Bay Community Energy](#) (EBCE). The coalition also won the establishment of a local development business plan (LDBP), a study to begin planning for community benefit solutions in Alameda County. This plan is key to creating local jobs, keeping the wealth in our community, and reducing local and global climate pollution. It is key to investing electricity revenues in local clean energy resources (wind, solar & energy efficiency) in Alameda county.

The current draft of the local development business plan provides an excellent framework for local energy resource development and most importantly, incentives that will benefit communities traditionally shut out of the clean energy economy, like renters, low income & people of color. We need your support to call for the adoption and implementation of the local development business plan as a roadmap to a local clean energy future for Alameda County.

Please RSVP [here](#) and join us Wednesday July 18, 5:00pm for a press conference and rally at Hayward City Hall (across from Hayward BART) followed by the East Bay Community Energy Board Meeting at 6pm.
